

KSD Sheeter

DUPLEX EQUIPMENT ABLE TO COMBINE TWO DIFFERENT FORMATS FROM SAME PARENT ROLL

The KSD sheeter is a high output machine meant for use in paper and cardboard factories after the production machines.

The configuration with direct connection to the production machine allows eliminating the intermediate winding step, by cutting directly from the pope reel of the cardboard machine.

It is a duplex unit allowing to cut two different formats at the same time with separate simplex and duplex cutting blocks.

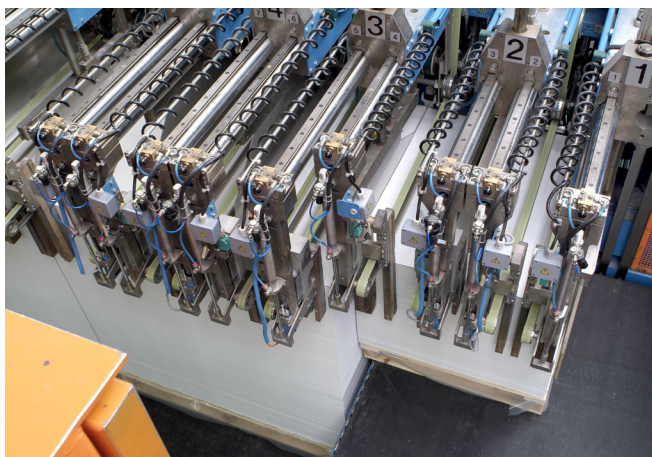

AVAILABLE OPTIONS

- › Automatic reel loading
- › Automated splicers
- › Automatic decurling
- › Automatic positioning of longitudinal slitters
- › Automatic positioning of stacking plates
- › Change of pallet at maximum speed without sheet rejection
- › Surface inspection system
- › Synchronised defect management with individual sheet rejection

ADVANTAGES

Allows incorporating all automation systems (longitudinal cut, superposition, stacking, change of size while working, etc.) to ensure absorbing the entire production.

Cutting two format lengths at the same time allows maximum use of the width of the paper machines.

Auto positioning of side joggers and backstops for simplex and duplex formats.

Double stacking section for duplex stacks.

REEL DIMENSIONS

Max. width	4.100 mm
Min. width	
Max. diameter	2.500 mm
Min. diameter	500 mm (800 mm with rotary unwinding)

FORMAT DIMENSIONS

Max. width	4.050 mm
Min. width	300 mm
Max. length	1.600 mm (Optionally up to 2100 mm)
Min. length	400 mm

SPEED

Max. Speed	350 m/min
------------	-----------

STACK DIMENSIONS

Max. height (incl. Pallet)	(incl. pallet): 1600mm (Optionally up to 2000 mm)
----------------------------	--
