

BM Paper winding machines

WINDING EQUIPMENT FOR ALL TYPES OF MATERIALS AND PRODUCTION CAPACITIES

Pasaban paper winding machines are designed to supply reels with even edge profiles and a perfect winding structure. A reliable paper winding machine concept meant for paper and cardboard manufacturers and converters.

BM paper winding machines are heavy-duty series machines that can incorporate all the automation systems required for the intended functions.

Also available for security paper.

ADVANTAGES

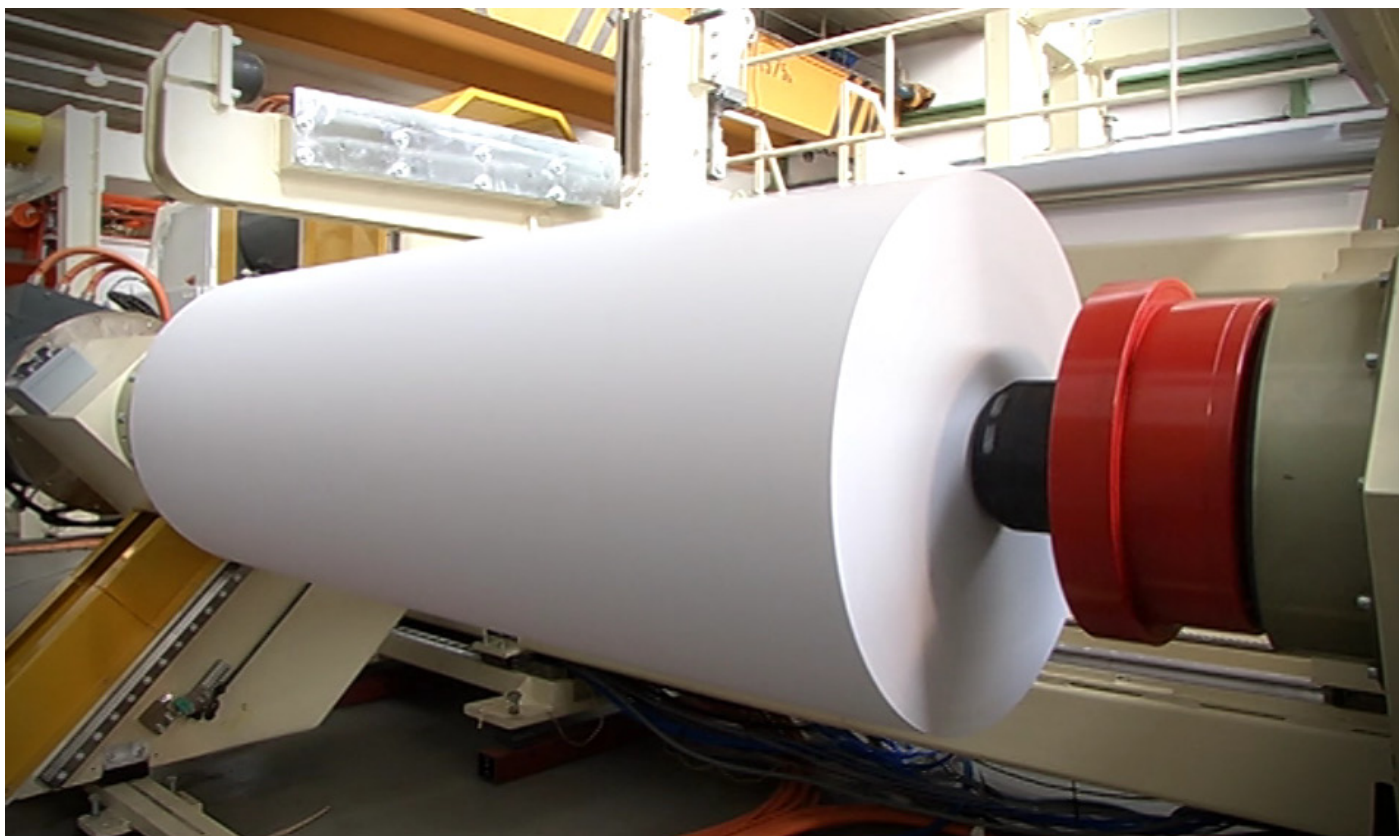

Heavy-duty double press paper winding machines that can incorporate all the automation systems required for their intended functions.

They are equipped with the latest drives available in the market.

Small details have been added to simplify operation and maintenance.

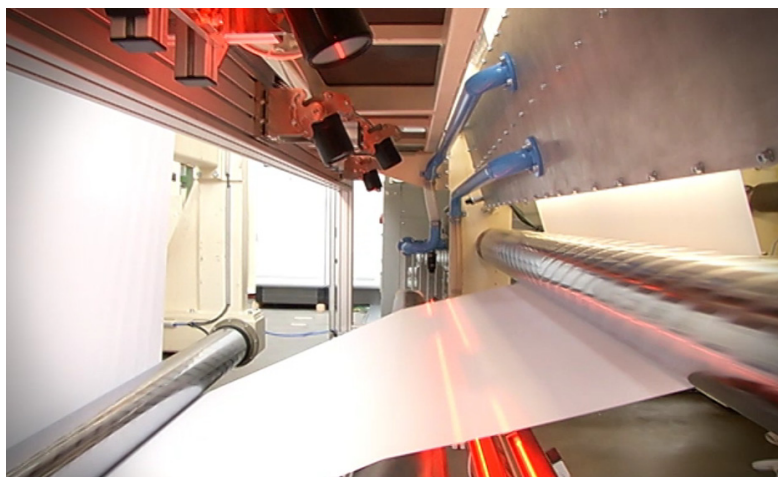

AVAILABLE OPTIONS

- › Unwinding without shafts for max. diameter 2500 mm.
- › Unwinding with shafts for max. diameter 3000 mm.
- › Automated web guide system
- › Tension control with load cells.
- › Regenerative brakes.
- › Automated slitter positioning
- › Individually driven slitters with motor
- › Automated feeding and cutting systems for cores
- › Automated splicing of finished reels
- › Automated stop by length or diameter of finished reel
- › Automated finished reel marker

CHARACTERISTICS

Max. reel width	6000 mm
Minimum reel width	1600 mm
Material to wind	Paper, cardboard, non-braided
Grammage	from 18 g/m ² to 1.200 g/m ²
Max. diameter of mother reel	2500 mm
Max. diameter of finished reel	2100 mm
Speed	from 1000 m/min to 2500 m/min
Minimum width of finished reel	90 mm
